APPEARANCES

COMMITTEE MEMBERS:

Jose Luis Pacheco, Chairperson

Mullissa Willette, Vice Chairperson

Lisa Middleton

Eraina Ortega

Kevin Palkki

Theresa Taylor

Yvonne Walker

BOARD MEMBERS:

Malia Cohen, represented by Lynn Paquin

David Miller, Vice President

Ramón Rubalcava

Gail Willis, PhD

STAFF:

Marcie Frost, Chief Executive Officer

Doug Hoffner, Chief Operating Officer

Matthew Jacobs, General Counsel

Michelle Tucker, Chief, Human Resources Division

APPEARANCES CONTINUED

ALSO PRESENT:

Tim Behrens, California State Retirees

Jerry Fountain, California State Retirees

Brad Kelly, Global Governance Advisors

Peter Landers, Global Governance Advisors

PROCEEDINGS

1
2 CHAIRPERSON PACHECO: Good morning. I would like
3 to -- good morning, everyone. I'd like to call the
4 Performance, Compensation and Talent Management Committee
5 to order. The first order of business in open session is
6 to call the roll call.

7 Thank you.

8 BOARD CLERK TRAN: Jose Luis Pacheco?

9 CHAIRPERSON PACHECO: Present and good morning.

10 BOARD CLERK TRAN: Mullissa Willette?

11 VICE CHAIRPERSON WILLETTE: Here.

12 BOARD CLERK TRAN: Lisa Middleton?

13 COMMITTEE MEMBER MIDDLETON: Present.

14 BOARD CLERK TRAN: Eraina Ortega?

15 COMMITTEE MEMBER ORTEGA: Here.

16 BOARD CLERK TRAN: Kevin Palkki?

17 COMMITTEE MEMBER PALKKI: Good morning.

18 BOARD CLERK TRAN: Theresa Taylor?

19 COMMITTEE MEMBER TAYLOR: Here.

20 BOARD CLERK TRAN: Yvonne Walker?

21 COMMITTEE MEMBER WALKER: Here.

22 CHAIRPERSON PACHECO: Thank you, everyone.

23 I'd like to move on to the next item is the
24 Executive report. Mr. Hoffner, please.

25 CHIEF OPERATING OFFICER HOFFNER: Thank you, Mr.

1 Chair. Doug Hoffner, CalPERS team member. Today, we have
2 two items before you. The first item is 5A, your primary
3 consultant, GGA, will provide and present alternatives to
4 this item as it relates to the Committee's consideration
5 to align compensation for the executive investment
6 management classifications with the market. And two is
7 Item 6A, an annual incentive metrics review. It's being
8 presented as an information item today, so the Committee
9 can gain information and clarification, and provide
10 feedback to GGA before they bring back a formal
11 recommendation at the June meeting for the new fiscal
12 year.

13 With that, that concludes my report. Thank you,
14 Mr. Chair.

15 CHAIRPERSON PACHECO: Thank you very much. I see
16 no questions on that.

17 I'd like to move on to the action consent item.
18 What is the pleasure of the Committee?

19 COMMITTEE MEMBER MIDDLETON: Move approval.

20 COMMITTEE MEMBER TAYLOR: Second.

21 CHAIRPERSON PACHECO: I have first from Ms.
22 Middleton, a second from Ms. Taylor.

23 Is there any discussion?

24 All in favor?

25 (Ayes.)

1 CHAIRPERSON PACHECO: All opposed?

2 The motion carries.

3 COMMITTEE MEMBER TAYLOR: Do we need to do roll
4 call?

5 BOARD CLERK ANDERSON: No.

6 CHAIRPERSON PACHECO: The next item on the agenda
7 is number 4, information consent item. I didn't have --
8 there was no request for -- to pull any item from the
9 informational consent item, so we are now moving to action
10 Agenda Item number 5a, and compensation review and
11 recommendation for statutory position. And Ms. Tucker.
12 Thank you.

13 HUMAN RESOURCES DIVISION CHIEF TUCKER: Thank
14 you, Mr. Pacheco. Good morning, Mr. Chair, and members of
15 the Committee. Michelle Tucker, CalPERS team member.

16 Item 5a presents GGA's recommendations for
17 adjustments to the current salary and incentive ranges for
18 classifications covered by the Board's compensation
19 setting authority under Government Code section 20098 and
20 in alignment with the Board's approved market comparator
21 group.

22 In February of 2023, McLagan presented updated
23 compensation survey data for covered executive and
24 investment management positions. This was a follow-up
25 from February 2022 when McLagan presented similar

1 compensation survey data. At that time, the Committee
2 decided to reassess the comparator group and have McLagan
3 return with revised data.

4 To better align CalPERS compensation
5 opportunities with the Board's defined comparator group,
6 GGA has proposed alternatives focused primarily on
7 positioning the annual and long-term incentives more
8 competitively, as well as adjusting the base salary ranges
9 for a few classifications that are under market. The
10 proposed alternatives are intended to align total
11 compensation opportunities for these positions with the
12 total compensation opportunities of the comparator group.

13 With regard to the Chief Health Director
14 position, CalPERS team members worked with GGA to identify
15 comparable compensation data for the Committee's
16 consideration, including a number of California-based
17 health organizations and districts. Any changes adopted
18 by the Board to salary or incentive ranges will become
19 effective July 1st, 2023 or phased in as directed by the
20 Board. CalPERS team members will incorporate any approved
21 changes to base salary ranges, incentive schedules, and
22 any other plan design options into the Board's policy.

23 That concludes my opening remarks and we can
24 bring forward and invite Mr. Kelly and Mr. Landers to
25 begin their presentation.

1 CHAIRPERSON PACHECO: Thank you. Yes. Thank
2 you, Mr. Kelly and Mr. Lander[SIC].

3 Please present.

4 (Thereupon a slide presentation).

5 MR. KELLY: Excellent. Thank you very much and
6 good morning, everybody.

7 Just for everyone's background just to add to
8 Michelle's initial commentary, this has been a long
9 process. As -- for the information of the new Board
10 members particularly, this was started last year. When we
11 first did the benchmark study, there was some questions
12 around the composition of the peer group. We were asked
13 to come back and readdress that. We had interviews, if
14 you recall, with everyone of you to get your views and
15 opinions on how the peer group should be constructed. And
16 then in November of last year at the workshop, it was
17 agreed that you would follow a prescriptive methodology
18 around the peer group, which is one-third, one-third,
19 one-third. And then that direction was given to McLagan
20 and McLagan reran the data with that prescriptive
21 methodology applied.

22 So this is the results of all of that work. And
23 so we just want to make sure that we've addressed all the
24 concerns of the Board up to this point. One of the
25 issues -- or not -- I wouldn't say issues. One of the

1 things that has led to the situation we're in today is
2 that the last adjustments that were made were, our
3 understanding, roughly 2020. And there was this -- the
4 decisions of the Board not to run a benchmark survey to
5 look at, you know, market data. It was the decision to
6 age existing data. And so there was some adjustments that
7 were made to the pay bands and there was an addition of
8 the long-term incentive, which really hasn't materialized
9 yet, because it's a five-year performance period. And so
10 the real impact of that decision hasn't really taken hold
11 until you hit the end of that first performance period and
12 there's a potential payout or non-payout based on that
13 five-year performance.

14 So that being said, running the data again for
15 the first time in a number of years, there's been a lot of
16 progression that has been made in the pension world around
17 incentives and incentivization of employees. And that
18 is -- you know, it's fortunate in that the real -- and
19 you'll see in the data, the real delta is between your
20 current compensation and what we're recommending is mostly
21 around the at-risk pay, the pay for performance. And I
22 would direct your attention to the appendices that we
23 provided with the pie charts on what the -- what the
24 value-add would be if everyone was to hit that actuarial
25 threshold and what the cumulative payout -- associated

1 payout would be.

2 So as you can see on the slides, you're paying
3 out a minor, minor, minor fraction of the performance that
4 you're putting before your employees. And so with that
5 going forward, Peter is going to walk you through the
6 objective findings and the recommended pathway forward,
7 because we wanted to give you some options, because, you
8 know, there's some adjustments that are required. And how
9 you want to make those adjustments is totally up to -- up
10 to this Committee and up to the Board.

11 Okay. And with that, I'll turn it over to Peter.

12 MR. LANDERS: Thanks, Brad. Can everyone hear me
13 okay.

14 CHAIRPERSON PACHECO: Yes.

15 MR. KELLY: And just for point of reference, for
16 those of you who don't know though, Peter unfortunately
17 could not join us today. His wife is due any day now and
18 it would not be a good spousal decision to be here, if --

19 (Laughter).

20 MR. KELLY: -- as you would all agree. And so,
21 you know, Peter is able to join via Zoom here. So just
22 for everyone's knowledge, that's why I'm here and Peter is
23 not.

24 --o0o--

25 MR. LANDERS: Thanks, Brad. Appreciate that. So

1 you know, what we want to do today is really walk through
2 some recommendations we observed, if you recall, in
3 February, the gaps that existed.

4 If we can turn to the next slide, please.

5 --o0o--

6 MR. LANDERS: Next slide.

7 --o0o--

8 MR. LANDERS: So again, as a recollection, we
9 looked at executive positions as well as Investment staff.
10 Again, the key findings of the competitiveness were from
11 the February PCTM meeting. If you recall, again, there
12 were some large gaps, material gaps that were found that
13 were very similar to the findings of last year's review as
14 well. So even with the change and more prescriptive peer
15 group methodology, the results stayed very similar in
16 terms of those gaps, with the gaps continuing to be
17 largely on the at-risk incentive compensation side that
18 Brad has just mentioned, both on the annual incentive, as
19 well as the long-term incentive side.

20 So while there are some adjustments that we are
21 recommending to the base salary ranges, the lion's share
22 of our recommendations are driven by at-risk incentive
23 pay, meaning that, yes, there is an increased opportunity
24 to earn a higher level of pay, but that level of pay will
25 only be earned if results are generated for CalPERS, both

1 from an investment perspective, but also for certain folks
2 as well against other important criteria, whether it's
3 member satisfaction, whether it's engagement scores,
4 whether it's cost effectiveness.

5 So needless to say, the at-risk incentive means
6 its there, but if you don't get the results for the plan
7 members, you don't get that value-added returns. On the
8 long-term incentive side, you're not beating that
9 actuarially required rate of return of 6.8 percent, then
10 these incentives will not a pay out or pay out at lot
11 lower level than the potential target opportunity.

12 If we can move to the next slide, please.

13 --o0o--

14 MR. LANDERS: Just to be clear how we have set
15 our recommendations is to be targeting the median or the
16 midpoint of that combined peer group of that weighted
17 methodology, which for the executive staff is one-third
18 public sector agencies, one-third public pension funds,
19 and one-third private sector. And then for the investment
20 staff, two-thirds public funds and one-third private
21 sector. So again, we've looked at the median of that
22 combined peer group as being -- and as this Committee and
23 the Board directed us back in November, being indicative
24 of, you know, the competitive level that you want to be
25 targeting pay to.

1 We did reference the Chief Health Director. That
2 role is quite unique and is not something that is typical
3 in the investment world, even in most pension funds, even
4 within, you know, a lot of public agencies. So we have
5 had to use a slightly refined peer group for that role,
6 which again as the CalPERS team member had mentioned, Ms.
7 Tucker, that was a group of similar California-based
8 agencies with similar types of health roles to the Chief
9 Health Director role. And we've again targeted the median
10 of those California-based agencies as a whole as being
11 again indicative of a market competitive level.

12 And just a reminder when we talk about things
13 like total cash compensation or total compensation, total
14 cash compensation means salary plus that annual incentive,
15 award that is, you know, paid, yes, based on multi-year
16 investment returns, but is paid on an annual basis. Total
17 compensation is your salary, your annual incentive, as
18 well as then that long-term incentive, which is tied to
19 five-year absolute total share return performance being
20 that 6.8 percent required rate of return.

21 If we can move to the next slide, please.

22 --o0o--

23 MR. LANDERS: Next slide.

24 --o0o--

25 MR. LANDERS: Perfect.

1 Just as a reminder, these were the gaps that were
2 identified back at the February meeting. And again, these
3 gaps are to the median, so it's the midpoint of the
4 CalPERS range to the median of the market of that combined
5 peer group. And we've added in the Chief Health Director
6 position as well against that group of California-based
7 agencies. So you can see the sizable gaps, largely again
8 due to, you know, a lower-than-market incentive or at-risk
9 incentive pay that we are trying to solve through our
10 recommendations today.

11 If we can move to the next slide, please.

12 --o0o--

13 MR. LANDERS: So the rationale -- as a reminder,
14 four recommendations. One is, of course, to align your
15 compensation levels more competitively with the median of
16 your policy aligned peer group that you as a Board and as
17 a Committee have said is where you want to be targeting
18 pay. We're going to ensure that base salary range levels
19 are competitive with the peer group, so they're not above
20 market, but they're also not below the market that -- of
21 that combined peer group.

22 We want to reflect the fact that for many of the
23 executive staff member roles that are seeing some of the
24 salary range adjustments, some of these haven't been
25 adjusted in -- materially in three plus years. There was

1 a small adjustment made to the maximums I believe at the
2 January meeting, but more material increases that may have
3 been warranted have not been made in three plus years. We
4 want to ensure that a meaningful and competitive amount of
5 compensation is placed at risk through incentives. We at
6 GGA are very much proponents of tying a large portion of
7 anyone's pay opportunity to at-risk incentives.

8 And lastly, especially for the executive
9 management positions, that there is, you know, some
10 hesitancy, and we can understand why, to make certain
11 roles eligible for the long-term incentive at this time,
12 ones that, you know, based on the market data, you could
13 argue, you know, some roles within public agencies and
14 that, and even certain pension funds may not be eligible
15 for long-term incentive. And so we're wanting to reflect
16 that as well for our recommendations.

17 If we can move to the next slide, please.

18 --o0o--

19 MR. LANDERS: So we wanted to provide the
20 Committee with a couple of alternatives, both for the
21 executive management staff as well as the Investment
22 staff. And we've sort of bucked -- bucketed them into two
23 sort of strategies, one is an align-to-median strategy,
24 which would literally say, you know, where is generally
25 the median of this policy-aligned peer group and realign

1 everyone to the median of that combined peer group or
2 within a small variance of that range.

3 The second alternative is internally equal below
4 CEO strategy, meaning that even if there is some
5 differences between certain roles that would say that, you
6 know, some roles maybe deserve to be paid a little bit
7 higher incentive opportunity than others, we recognize
8 that all of the management staff working below the CEO as
9 their direct reports are all generally valued equally and
10 therefore, we're going to structure the pay opportunities
11 so that they are all paid equally and in a more similar
12 pay structure, if you will. So those are just the two
13 main source strategies.

14 If we can move to the next slide, please.

15 --o0o--

16 MR. LANDERS: So on the salary adjustment side,
17 you can see that when we looked at the CEO position, we
18 did not see a material gap to the market, and so therefore
19 there was no need to adjust the CEO salary range. We felt
20 it was still market competitive and gave you, you know,
21 space to work with. But you can see that for the CFO, the
22 General Counsel, COO, and the Chief Actuary, all of which
23 we were able to find good meaningful data from the McLagan
24 research from public agencies and that, there was a gap to
25 market from a salary perspective comparing the current

1 midpoints to the midpoints in the market or the median of
2 the market. And so you'll see that we've, you know, made
3 sure to recommend salary adjustments that place those
4 roles generally more in line with the median of that
5 combined peer group.

6 If we can move to the next slide, please.

7 --o0o--

8 MR. LANDERS: The Chief Health Director, and this
9 is something we wanted to highlight, and it came out
10 through the analysis and through the market research that
11 we did. This role is quite unique. I think everyone
12 probably around this table would admit that this role is
13 quite unique compared to other roles within CalPERS, but
14 even within many other State agencies in the State of
15 California, even with other pension funds, definitely even
16 when you look at the private sector. And what came out
17 through the analysis working with the CalPERS team members
18 was currently CalPERS you make this role eligible for an
19 incentive, just like all the other direct reports to the
20 CEO.

21 But when you look at the market data, and it's
22 included in the appendix for your reference, most, if not
23 all, of the similar roles in California are actually just
24 paid a salary only and are not made incentive eligible.
25 And there's, you know, a variety of reasons for that. But

1 it then provides, you know, a couple of different
2 alternatives of how you could potentially structure the
3 pay of this unique Chief Health Director role potentially
4 differently than the other roles, which have very high
5 market prevalence of a salary and incentive, for some even
6 long-term incentives as well.

7 And so we've put forth a couple of different
8 strategies in terms of how you could adjust the salary
9 range for the Chief Health Director. One is to
10 acknowledge this role is unique. It's quite different
11 than the other roles at CalPERS. It recognizes that
12 similar roles in the market typically pay a higher salary
13 and no incentive at-risk pay. And so you would adjust the
14 current band materially to focus on a salary-only approach
15 to this one specific role. And you can see that, you
16 know, that leads to a midpoint of about 425,000, which
17 aligns with approximately the median of those
18 California-based groups.

19 The second alternative you would still adjust the
20 salary, but you would do so maintaining the at-risk
21 incentive for the Chief Health Director role. So making
22 sure that the structure of pay for this role is similar to
23 the other direct reports to the CEO. So you can see a --
24 you know, it's still a meaningful, but not as high of an
25 adjustment to the salary range if you continue to include

1 that at-risk incentive.

2 So those are a couple of alternatives I would --
3 you know, we'll go through this presentation, but I would
4 encourage this Committee to think through and, you know,
5 come up with -- it really is a philosophical discussion at
6 the end of the day and what you feel most comfortable
7 with. Do you want to position this role in terms of the
8 pay structure, more towards what other similar roles are
9 in the marketplace or do you want to keep it generally,
10 you know, while maybe not eligible for as much incentive
11 pay as others, still have a structure that is similar to
12 all of the other CEO's direct reports with a salary and an
13 incentive.

14 If we could move to the next slide, please.

15 --o0o--

16 MR. LANDERS: So this is Alternative 1. This is
17 an align to median strategy. And you'll see what we've
18 done in this slide on this stable is we've highlighted the
19 current opportunities from -- as a percentage of salary
20 for each of the executive roles, and as well the long-term
21 incentive opportunities. And what we've highlighted in
22 red, in those red boxes, are the adjustments, the
23 recommended adjustments. And you'll see some, you know,
24 very material adjustments for most of the roles.

25 The one thing I will point out is you will see

1 that the market data, if you want to solely align everyone
2 to the median of the market data, of that combined peer
3 group, shows that the General Counsel, COO, and Chief
4 Actuary should actually get a higher at-risk incentive,
5 and the CFO would actually have a slightly lower increase
6 to their annual incentive. And you will see that that
7 compares to the current practice, which is to have
8 everyone have the same incentive opportunity that maxes
9 out at that 40 percent. So this is sort of our
10 Alternative 1.

11 This Alternative 1 also for the Chief Health
12 Director would remove the incentive altogether from the
13 role, because it would say the market data supports just
14 paying this role with a salary only and no incentive. So
15 this very much -- this alternative aligns to, again, the
16 median of the market in a pay structure that generally
17 aligns to the market.

18 Next slide, please.

19 --o0o--

20 MR. LANDERS: And this just shows the resulting
21 basically analysis of what the gap to the market is, if
22 these recommendations are made. And you can see, you
23 know, other than the CEO role, which, you know, to make
24 the cycle adjustments to align perfectly to the median
25 would require decoupling or basically separating out how

1 the long-term incentive opportunity is determined from the
2 annual incentive, because right now they are very much
3 linked. What you generally generate on the annual
4 incentive side then leads to what you are eligible for as
5 a long-term incentive moving forward.

6 We would have to make a very sizable shift that
7 is not recommended at this time for the CEO role. We're
8 still recommending very material increases and adjustments
9 to that role, but we wanted to be at least more
10 conservative of that side. And you'll see though what
11 we've done for the other five direct reports to the CEO is
12 generally positioned total cash, so that's salary and
13 annual incentive, around the median of the market. And
14 because you're within, you know, plus/minus 10 percent of
15 the market, these recommendations would generally get you
16 within that sort of, again that range, that competitive
17 range for the roles.

18 You will see, you know, there is some prevalence
19 in the combined peer group of a long-term incentive for
20 some of those roles, CFO, General Counsel, COO. And
21 you'll see that that is creating still a gap from a total
22 compensation perspective. But we feel, you know, at least
23 getting these roles from a total cash perspective for now,
24 leaving them not eligible for long-term incentive is a
25 good strategy to at least again phase in some of the

1 potential adjustments you may want to make in the future,
2 but get them into a competitive range now from that
3 perspective.

4 If we can move to the next slide, please.

5 --o0o--

6 MR. LANDERS: This Alternative 2, if you recall,
7 is what we call internally equal below the CEO. This
8 would, as you can see with the red box, put all of the
9 CEO's direct reports at the same annual incentive
10 opportunity levels. So the CFO would get a slight bump up
11 to 70 percent from Alternative 1, which was at 60. And
12 the Chief Health Director, we wouldn't necessarily, you
13 know, bring them to the same level as everyone else,
14 because the market data for that role does not support it,
15 but that role would still remain eligible for an
16 incentive. And so from a structure perspective, they
17 would be paid in a similar structure to all of the CEO's
18 direct reports. So those are the only slight differences
19 that.

20 If we can move to the next slide, please.

21 --o0o--

22 MR. LANDERS: And you will see again the
23 resulting impact in terms of the market positioning. What
24 I'll note is the CFO role becomes -- still within that
25 plus/minus 10 percent range, but becomes a little bit more

1 competitively positioned in the market. And you'll notice
2 the Chief Health Director, while we've done it through
3 salary and an incentive, still is positioned right at the
4 median of the peer group.

5 Next slide, please.

6 --o0o--

7 MR. LANDERS: So, Mr. Chair, maybe I'll just stop
8 there. I don't know if you want to wait and have us go
9 through the entire presentation or if you want to stop and
10 have a discussion on just the executive roles for now.
11 I'll leave that up to you and your discretion.

12 CHAIRPERSON PACHECO: Thank you. No, I would
13 like to continue on. Thank you.

14 MR. LANDERS: Okay. So next slide, please.

15 --o0o--

16 MR. LANDERS: Perfect. Just a reminder, this is
17 again the investment management positions. You'll see
18 again, as we mentioned earlier, a lot of the salaries were
19 adjusted around 2020 or so. And you'll see they still
20 remain generally pretty competitive outside of a couple
21 roles that we would, you know, make some smallish
22 adjustments to. You can see again though the lion's share
23 of the gap to the market is through the at-risk incentive
24 pay, and that's highlighted in those red boxes. If you
25 can move to the next slide, please.

1 --o0o--

2 MR. LANDERS: In terms of the investment
3 management positions, the rationale for those
4 recommendations again continues to be aligned
5 competitively with the median of the peer group. Again,
6 ensure the base salary range levels are competitive,
7 reflect that movement in the market that has increased the
8 level of compensation that is placed at risk through
9 incentive pay for these types of roles, and generally
10 reflect a mix between salary, annual, and long-term
11 incentive that aligns with market practice. So all of
12 that has gone into the recommendations we've brought
13 forward.

14 Next slide, please.

15 --o0o--

16 MR. LANDERS: Similar to the executive staff,
17 we've outlined the alternatives with two alternatives, one
18 again being an align to median strategy, where again we're
19 generally targeting the median of that peer group from a
20 total compensation perspective, and aligning the incentive
21 opportunities and salary levels accordingly. The second
22 alternative being that while the -- and I'll get into this
23 when I talk about this alternative a little bit more, but
24 would position the Deputy CIO position, which I think
25 everyone would agree is a -- you know, a more senior and

1 larger role with larger amounts of responsibilities, with
2 a higher incentive opportunity than the Managing
3 Investment Director level that is below it. But I'll get
4 into a little bit more detail when we walk through some of
5 the numbers.

6 Next slide, please.

7 --o0o--

8 MR. LANDERS: So in terms of salary adjustments,
9 there were three roles that we saw that could require some
10 slight adjustments to the salary levels. I think the most
11 material change needing to be made for the Associate
12 Investment Manager. That was where the largest gap to the
13 market existed, but we did note a couple of housekeepings
14 that would position, you know, CIO and COIO positions
15 slightly more competitively in the market.

16 Next slide, please.

17 --o0o--

18 MR. LANDERS: So Alternative number 1 which is
19 that aligned to median strategy, you will again see that
20 the current incentive opportunities on sort of the left
21 side and then the recommended -- recommendations on the
22 right-hand side highlighted in red boxes. And you will
23 see again -- as we talked about the largest gap being
24 at-risk incentive pay, you will see some sizable more
25 material adjustments that are required to put these roles

1 competitively in the marketplace. I note under this
2 alternative in particular the Deputy CIO and the Managing
3 Investment Director having the same incentive opportunity
4 as a percentage of salary. Whereas, currently, the Deputy
5 CIO has a 10 percent higher at target incentive
6 opportunity.

7 So I highlight that under this strategy those
8 roles would have the same incentive opportunity as a
9 percentage of salary. Obviously, the Deputy CIO has a
10 higher salary, so it will lead to higher numbers, but
11 there is that sort of -- you know, that more senior level
12 role with more responsibilities right now at the same
13 level as more of a direct report. And we wouldn't
14 necessarily always see that very often in the marketplace.

15 Next slide, please.

16 --o0o--

17 MR. LANDERS: This then shows the resulting
18 alignment to the median. You'll note that we've, you
19 know, gotten everyone with say a plus/minus two percent
20 range. I note for the COIO, and this was one position
21 that we saw, you know, to us, we looked at the data, even
22 last year versus this year, and, you know, to our role and
23 our understanding of this role in the marketplace didn't
24 necessarily require as much of an increase as the market
25 data indicated for that role. And so you'll see there is

1 a slightly higher gap to market for that role, but we
2 still feel our recommendations will position that role
3 competitively with the -- with the marketplace.

4 Next slide, please.

5 --o0o--

6 MR. LANDERS: This is now Alternative number 2.
7 And you'll notice the one difference -- everything else is
8 pretty much the same. The one difference being that we
9 have positioned the Deputy CIO with a 10 percent higher
10 annual and a 10 percent higher long-term incentive
11 opportunity as a percentage of salary at target than the
12 Managing Investment Director. So this would again
13 recognize that the Deputy CIO is a larger role, has more
14 responsibilities, and so from an internal equity
15 perspective, you know, we want to acknowledge that. Just
16 like we do currently with the 80/70 currently, we want to
17 acknowledge that through giving that Deputy CIO a slightly
18 higher incentive opportunity.

19 If we can move to the next slide, please.

20 --o0o--

21 MR. LANDERS: And you'll see that market position
22 generally remains the same for all the roles except the
23 Deputy CIO is positioned slightly more higher in the
24 marketplace from a total compensation perspective than
25 they were under Alternative 1.

1 And so next slide, please.

2 --o0o--

3 --o0o--

4 MR. LANDERS: We do note that, you know, these
5 are more material increases, just like we noted last year.
6 And if you were to look at last year's analysis and
7 recommendations and compared them to this year's
8 recommendations, you'll see that most of -- most of it has
9 stayed relatively the same. There's some that maybe have
10 gone slightly up and some that our recommendations have
11 gone slightly lower than last year, but we do recognize
12 that, you know, these are material increases. Because you
13 haven't necessarily made adjustments over time, and it has
14 been a few years, that has led to a larger gap being
15 observed to the market. And so we understand that you may
16 not want to make all these changes all at once.

17 And so what we've done is we've also given you
18 for consideration as a Committee a potential phase-in
19 strategy. And we've worked in the past with other public
20 funds, other financial organizations and just clients in
21 general that have had, you know, larger adjustments that
22 they needed to make to compensation levels. And we've
23 worked with them over the years to develop a phase-in
24 strategy over a two- to three-year period. So you make
25 them over time as opposed to doing it all at once. And so

1 we'll move to the next slide, but essentially we've --

2 --o0o--

3 MR. LANDERS: -- highlighted that potential
4 phase-in on the next two slides. So you can see here for
5 the executive management staff, we're proposing, you know,
6 if you want -- if you don't want to do it all at once, a
7 two-year phase-in strategy. So you can see right now the
8 target annual incentive is 27 percent of salary. For the
9 CEO, you would move it to 65 percent in year one, which
10 would be fiscal 23-24. Then in 24-25, you would move from
11 65 percent up to 100 percent.

12 So you essentially do -- you know, go about half
13 the way in year one and then the other half first for year
14 two, and so on and so forth through the remaining roles
15 that you see there. It was a similar strategy. I note
16 for the CFO and Chief Health Director we've provided two
17 numbers for each. That's really depending on whether you
18 were to go with Alternative 1 or Alternative 2 for those
19 roles. But you can see a similar sort of go half the way
20 in year one, half the way in year two.

21 And then next slide, please.

22 --o0o--

23 MR. LANDERS: The same approach applies to the
24 investment management staff. So you'll see again a
25 phase-in strategy where you make half of the sort of

1 adjustment in year one and then the other half is made in
2 year two. And you can see again for the Deputy CIO,
3 depending on which alternative you choose, 1 or 2, you
4 request see, you know, how that phase-in would work under
5 either of those approaches, so the double numbers there.

6 Next slide, please.

7 --o0o--

8 --o0o--

9 MR. LANDERS: And then very quickly, before I
10 maybe pass it back to the Chair, we just want to highlight
11 and we want to -- you know, we talk about making sure
12 that, you know, you're equipped with understanding of yes,
13 you know, these are, in dollar terms, material
14 adjustments, but let's look at, you know, holistically if
15 you were to achieve these level of incentives, what is
16 sort of that sharing ratio? What is that percentage that
17 you are actually sharing of the added returns that this
18 group and this team has worked and achieved for members?
19 And you can see just through this slide here, if you were
20 to achieve maximum annual long-term incentives -- so we're
21 not talking about target. We're talking about the highest
22 level of incentive payouts that you could. Over a
23 five-year period, the math shows that less than 0.1
24 percent of the benefit to members would be shared as
25 incentive pay to these folks. And that again takes into

1 account achieving that 6.8 percent and ends -- being that
2 benchmark much, of course, by the maximum allowable.

3 Next slide, please.

4 --o0o--

5 MR. LANDERS: We looked at and said over a
6 five-year period, what is the maximum of your percentage
7 of growth over the actuarial threshold? And you'll see
8 that it's less than 0.6 percent. So going over that 6.8
9 percent, you know, actuarial threshold, you're only going
10 to be sharing 0.6 -- less than 0.6 percent of that with
11 team members through the incentive pay.

12 Next slide, please.

13 --o0o--

14 MR. LANDERS: And then lastly, we actually looked
15 and said, okay, you know, we understand that, but let's
16 look at, you know, if we just barely beat the actuarial
17 threshold, so we get 6.9 percent or, you know, we get up
18 to around 8.1 percent, which essentially is, I think, the
19 maximum of where like the long-term incentive would pay
20 out, what are our sort of incentive levels at different
21 rates of return?

22 And you can see that even if you just barely beat
23 the actuarial threshold, you annualize 6.9 percent, you're
24 still only sharing about five -- just over five percent.
25 And the lion's share, so over 94 percent of that benefit

1 is going back to the members. And then what you'll see is
2 as you generate higher and higher rates of return, that
3 sharing ratio becomes smaller and smaller.

4 And you might ask, well, why didn't we show
5 6. -- 6.7, 6.8? If you recall, the plan especially the
6 long-term incentive plan, does not pay out anything if you
7 don't generate 6.8 percent. So if you earn 6.7, that
8 long-term incentive isn't paying you out anything. So,
9 you know, any of the value there is being kept solely by
10 the members and not shared with incentives to the -- to
11 the -- to the team members.

12 Next slide, please.

13 --o0o--

14 MR. LANDERS: And next slide.

15 --o0o--

16 MR. LANDERS: So in terms of next steps, before
17 we pass -- I pass it back to the Chair, you know, in our
18 view, the next steps that we see is, you know, having a
19 good discussion and approving the required adjustments to
20 the base salary ranges that we've aligned to position
21 CalPERS more competitively, also approving the required
22 adjustments to the annual long-term incentive
23 opportunities to position you more competitively. And
24 again, just for clarity, as you're -- you know, as your
25 primary consultant for the CFO and the Deputy CIO roles,

1 we recommend an Alternative number 2 strategy, which would
2 position these roles accordingly internally with others.
3 So it would position the CFO at the same incentive
4 opportunity levels all the other of the CEO's direct
5 reports, and it would recognize the greater
6 responsibilities and role of the Deputy CIO. And so it
7 would position that role as slightly above the Managing
8 Investment Director.

9 And then for the Chief Health Director role, we
10 actually recommend moving away from a salary-incentive
11 structure to a salary-only structure that aligns with
12 again the types of individuals and the types of roles that
13 you'd be recruiting from for this role in the future, and
14 trying to retain your current Chief Health Director on the
15 market. You know, and it removes that need to figure out,
16 you know, any unique incentive sort of metrics that need
17 to be done for that role given how unique it is compared
18 to others within CalPERS.

19 Lastly, a couple other things. Approve, if you
20 desire, the use of a two-year phase-in strategy.
21 Either -- either approach making the change all at once or
22 phasing it in would be considered, I think, in -- aligned
23 with what -- how others have approached those things in
24 the past, because you could do it in either way all at
25 once, rip it off like a band-aid or sort of phase it in.

1 And then lastly, of course, assuming you make these
2 adjustments and these approvals today, direct CalPERS HR
3 to reflect any of these adjustments within an updated
4 Compensation Policy that I believe would come forth at the
5 June meeting.

6 So, you know, there's other appendices. Happy to
7 go through them, if there are questions. But in the
8 interests of time, I'll maybe pass it back to the Chair
9 and open it up for any, you know, questions that people
10 may have.

11 CHAIRPERSON PACHECO: Thank you. Thank you,
12 Peter, and thank you, Brad, for your comments here, for
13 your comp -- for the compensation analysis and
14 presentation on the comprehensive -- comprehension
15 alternatives for the executive and investment positions
16 here at CalPERS.

17 I also want to appreciate your thought process in
18 highlighting the gaps between the current composition
19 levels of these covered statutory positions within the
20 executive and the management groups in order to arrive at
21 a place with the following alternative recommendations in
22 closing those gaps. I really do appreciate that.

23 I want to mention during our February 2023
24 Performance, Compensation and Talent Management Committee,
25 I mentioned some remarks. And these remarks were I see

1 the compensation conversation regarding these covered
2 positions as not only a local matter, but also a global
3 recruitment issue, as we look to add more active risk to
4 our portfolio. You know, this is one of the reasons that
5 I wanted to be Chair of the Performance, Compensation and
6 Talent Management Committee, recognizing the folks in the
7 Investment Office are valued for their hard work and
8 dedication, so our two 2.1[SIC] CalPERS members are able
9 to retire with dignity and with respect after working
10 decades as public employees.

11 You know, however, in order for us to get the
12 types of returns in the CalPERS fund in the long run, our
13 attention must be laser, laser focused on rock bottom
14 performances across our asset classes and awarding those
15 investment folks who put in the work and effort to achieve
16 the types of risk-adjusted rate of returns in our
17 portfolio, so our fund moves forward in the long run.

18 Outperforming the passive benchmarks alone will
19 no longer suffice. As we add more direct investing, which
20 will require and advanced skill set to accomplish over
21 time, these compensation levels will give us a better
22 chance of recruiting and awarding direct strategies moving
23 forward in the long run.

24 Thus, after careful consideration and after
25 enormous amount of study on these recommendations, I would

1 like to entertain the following motion.

2 To approve the required adjustments to base
3 salary ranges to position CalPERS more competitively, to
4 approve the required adjustments to annual and long-term
5 incentive opportunity levels to position CalPERS more
6 competitively, specifically for the Chief Financial
7 Officer and Deputy Chief Investment Officer respectively,
8 opting for Alternative number 2, given its understanding
9 of how CalPERS has historically positioned the Chief
10 Financial Officer and Deputy Chief Investment Officer in
11 relation to other roles internally within the system. For
12 the Chief Health Director role, opting for alternative
13 number 1, given its understanding of the criticality of
14 this role to CalPERS, the structure of the composition
15 paid to similar roles in the market, and to ensure its
16 competitiveness in the long run. And finally, to approve
17 the use of a two-year strategy to phase in incentive
18 opportunity adjustments over time.

19 VICE CHAIRPERSON WILLETTE: So moved.

20 CHAIRPERSON PACHECO: Moved by Mrs. Willette.

21 COMMITTEE MEMBER PALKKI: Second.

22 CHAIRPERSON PACHECO: Second by Mr. Palkki. I'd
23 like to open it for discussion.

24 Just -- let me get this first of all. And
25 Theresa, you are on.

1 COMMITTEE MEMBER TAYLOR: Thank you very much.

2 I agree with the motion. The only -- I think
3 this has been a long time coming. I'm very happy to see
4 the motion. The only thing I think -- I don't know.
5 Maybe we should rip off the band-aid. The use of two-year
6 strategy feels like -- so we'll be trying to phase this in
7 for a couple years, and then they get their raise, right?
8 And then like two years later will we be looking at
9 another market analysis to do this over again? So I'm
10 wondering is it kind of clumsy to do the two-year phase-in
11 strategy? Should we just -- and maybe, Ms. Tucker, you
12 can respond to that or GGA. Go ahead. Whichever wants
13 to.

14 HUMAN RESOURCES DIVISION CHIEF TUCKER: Thank you
15 for that question, Ms. Taylor. So certainly we can
16 execute whichever you decide, the two-year phase-in for
17 the incentive or the immediate implementation of the full
18 ranges that are adjusted. The Board did discuss last time
19 about a strategy to sort of set regular times to review
20 compensation, so that would be occurring regardless. But
21 certainly we can do whichever method you prefer.

22 Anything else, Brad?

23 MR. KELLY: I would just say from an
24 administrative standpoint, it would be much easier just to
25 do it one fell swoop, considering that you want to get on

1 a regular cycle to start making these adjustments to make
2 sure that you're always being competitive to market. The
3 reason why we provided the alternative is because
4 sometimes it's too material for people to get beyond that
5 hurdle. But I'd also remind this Committee that it's been
6 a significant amount of time since you've truly
7 benchmarked to the marketplace. So that's why you've
8 gotten to this situation you're in.

9 But the main -- as Peter pointed out and as I
10 also pointed out, the lion's share of these adjustments
11 are on that performance section of their compensation. So
12 if you're comfortable with that knowing that if you don't
13 realize the performance, if these employees don't realize
14 the performance that you've put forward, then they don't
15 get paid, you know, what is in the package. And if you're
16 comfortable with that, then we would fully support the
17 bandage removal and to do it in one fell swoop.

18 COMMITTEE MEMBER TAYLOR: Okay. I appreciate
19 that. Yeah, I kind of -- I feel like we just need to get
20 it done. So, Mr. Chair, I'm wondering if -- I can't make
21 it, because I'm asking questions, but get back in line and
22 make a friendly amendment to the motion, so --

23 CHAIRPERSON PACHECO: That would -- that would be
24 done by the maker of the motion, which would be Mrs.
25 Willette, I believe. I believe that's --

1 COMMITTEE MEMBER TAYLOR: No. It's a friendly
2 amendment. She doesn't -- does she make --

3 VICE CHAIRPERSON WILLETTE: I have to accept it.

4 CHAIRPERSON PACHECO: She has to accept it.

5 COMMITTEE MEMBER TAYLOR: Pardon me?

6 Well, I'm not -- I'm not supposed to make the
7 motion right now, anyway.

8 CHAIRPERSON PACHECO: Yes, Mr. Jacobs.

9 GENERAL COUNSEL JACOBS: Good morning. You can
10 make a friendly suggestion. The maker then would need to
11 adopt it, and -- as would the seconder of the motion.

12 COMMITTEE MEMBER TAYLOR: Okay. Friendly
13 suggestion?

14 VICE CHAIRPERSON WILLETTE: Yeah. Or should I --
15 I'll accept that friendly amendment to instead of a
16 two-year phase-in to just do it immediately, or the
17 one-year.

18 COMMITTEE MEMBER TAYLOR: Appreciate it. Thank
19 you. Who was the seconder? That was you.

20 VICE CHAIRPERSON WILLETTE: And the seconder.

21 COMMITTEE MEMBER PALKKI: Yeah, I'll second that
22 as well.

23 COMMITTEE MEMBER TAYLOR: All right. Thank you.

24 CHAIRPERSON PACHECO: So, Mr. Jacobs. Mr.
25 Jacobs. So do I need to repeat that again or -- with the

1 entertainment of that or not?

2 GENERAL COUNSEL JACOBS: No, you don't need to
3 repeat it. I think that before you vote it -- vote on the
4 motion, you should restate it, so that everybody is clear
5 on what exactly the motion is.

6 CHAIRPERSON PACHECO: And the motion would be
7 to -- would be to use the one-year instead of a two-year,
8 correct?

9 GENERAL COUNSEL JACOBS: That's the -- that's the
10 amendment to the motion, right.

11 CHAIRPERSON PACHECO: Immediate phase --
12 immediate phase -- immediate. Thank you. Thank you.
13 Thank you, Mr. Jacobs.

14 GENERAL COUNSEL JACOBS: You're welcome.

15 CHAIRPERSON PACHECO: Mrs. Ortega, you're up.

16 COMMITTEE MEMBER ORTEGA: Thank, you Mr. Chair.
17 Am I on?

18 Yeah. Thank you. I would have like to support
19 the recommendations on the Investment staff and the Health
20 Director change that's proposed, but I don't support the
21 changes for the executive staff largely related to my
22 objection to the comparator group, the one-third,
23 one-third, one-third, and the objections I've raised in
24 the past about that comparison.

25 Given that this motion has been structured as

1 kind of an all or nothing, I will be forced to vote no on
2 the entire motion. Thank you.

3 CHAIRPERSON PACHECO: Thank you.

4 Mr. Rubalcava.

5 BOARD MEMBER RUBALCAVA: Thank you, Mr. Pacheco.

6 I want to commend you and the Committee for taking this
7 issue on. It is distressing that we have -- these gaps
8 have been created.

9 I did have a question - I'm not sure it's for you
10 or for the consultants - on the Chief Health Director
11 position. The recommendation number one, which would, as
12 I understand it, take out the long-term -- the annual
13 incentive eligibility, I guess, but recognizing in the
14 rationale because we're unique. We are unique. We have
15 the second largest health population in the contract. So
16 I just want to make sure that under that alternative, we
17 still -- we stayed unique and recognized the complexity of
18 our health program. I just want to make sure that we're
19 not losing anything by going to Alternative 1 versus
20 Alternative 2, but I'm sure --

21 MR. LANDERS: I can try --

22 BOARD MEMBER RUBALCAVA: -- the Committee can
23 deal with that. Thank you.

24 MR. LANDERS: I can try and address that very
25 quickly. You will see, of course, that with that

1 adjustment, the base salary range does go to a much higher
2 level than under Alternative 2. And again, to be in line
3 with this Board and this Committee's philosophy of
4 targeting the median of the market or of the suitable care
5 group, we've, you know, structured it, so that the
6 midpoint of that salary range is competitive with others.
7 If you wanted to, you know, be more aggressive and, you
8 know, target a midpoint that's slightly higher than what
9 the other California organizations are doing, you could do
10 that. And the justification to your point, Mr. Rubalcava,
11 was, you know, that this is even more unique. Second
12 largest health care.

13 You would definitely have that -- I think there's
14 a rationale for that. But what we have done in our
15 recommendation is again aligning to your general
16 philosophy to target the median or the midpoint of the
17 market of the suitable peer group. We just have -- we've
18 set it in that -- in that sort of philosophy and in
19 that -- with that spirit in mind. And we do feel that,
20 you know, with the material adjustment that would be made
21 to the salary level for that role, it would give you a lot
22 of room to take into account, within the actual placement
23 of your current Chief Health Director or any future Chief
24 Health Director in the role, you could align them
25 accordingly within that range based on how you view the

1 incumbent in that role's performance.

2 You know, if it's really exceptional, you'd
3 probably position them at the higher end of the role. If
4 they're newer or starting out and still learning and
5 developing into the role, maybe on the lower end of that
6 range. But we feel like the adjustment that is
7 recommended puts you and places you competitively in the
8 market for this current incumbent but also for future
9 Chief Health Directors in the -- in the future.

10 BOARD MEMBER RUBALCAVA: Thank you for the
11 answer.

12 CHAIRPERSON PACHECO: Ms. Walker.

13 COMMITTEE MEMBER WALKER: Thank you.

14 I appreciate the recommendations from the
15 consultants and the thoughtfulness that went into it. I
16 know that it is not easy to -- well, for the consultants
17 maybe it is, but it's not easy at least for the Board to
18 look at compensation, look at higher compensation. You
19 know, people typically have a feeling in them that goes,
20 eww, do I want to do -- that's a lot. Should we do that?

21 But I fully believe that, one, I agree with your
22 recommendations, Mr. Chair. I thought that they were well
23 thought-out. I thought you made the appropriate case. I
24 believe that -- I appreciate the amendment that was made
25 and accepted, because I think that that's the right way to

1 go.

2 And I think this sets us on a path, not only for
3 today, but it will make it a lot smoother as we go forward
4 into the future. I mean, it is hard to initially think
5 like, oh, this is a lot, and maybe we should just like
6 chunk it off a little bit. But I think in this instance,
7 I think that is more painful than just recognizing that we
8 have a problem. It has been an ongoing problem. Let's
9 take care of this problem and have an even playing field
10 to move forward.

11 So with that, I support the recommendation as
12 amended.

13 CHAIRPERSON PACHECO: Thank you. Thank you, Ms.
14 Walker.

15 Ms. Middleton.

16 COMMITTEE MEMBER MIDDLETON: Thank you. Thank
17 you, Mr. Chair.

18 If possible, I would like to hear from Mr. Toth
19 specifically on issues related to the investment incentive
20 programs. And let me begin, Tom, by apologizing for not
21 giving you advanced notice I was going to ask these
22 questions, but here we are. As you look at these
23 incentive programs and the needs of our Investment Office,
24 do you have any recommendations regarding the direction we
25 should follow?

1 MR. TOTH: Ms. Middleton, Tom Toth, Wilshire
2 Advisors, the Board's investment consultant. I think I'd
3 start by echoing some early comments and complimenting the
4 Board on the thorough of the process. And process is
5 really critical when you're talking about these types of
6 structures.

7 I support the recommendations as stated here.
8 And one of the primary reasons, which I think is important
9 for the Board to keep in mind is what it does, the type of
10 investor that this structure with higher upside potential
11 when performance is reached, that type of investor is
12 going to be attracted to this structure, more so than one
13 which is tilted more towards non-at-risk pay salaries.

14 And I think that's a really important component
15 as we look to continue Building out a world class
16 organization, money management organization. And at the
17 end of the day from an investment standpoint, this is a,
18 you know, \$450 billion plus asset management organization.
19 And I don't need to tell you this, but the competitiveness
20 for finding and retaining talent is very intense. And
21 this, I think, puts you in a very strong position to get
22 the right people, the right investors in the right seats.

23 COMMITTEE MEMBER MIDDLETON: All right. Thank
24 you.

25 Mr. Chair, that's my question. I do have some

1 comments. And if you'll bear with me --

2 CHAIRPERSON PACHECO: Absolutely.

3 COMMITTEE MEMBER MIDDLETON: -- I've got more
4 than the usual number of comments that I'm going to make.

5 CHAIRPERSON PACHECO: I -- for -- you -- it's all
6 your -- it's all yours, Ms. Middleton.

7 COMMITTEE MEMBER MIDDLETON: All right. Thank
8 you.

9 First, I would have supported moving forward with
10 the investment recommendations, but I will be also forced
11 to vote no, because we are including the executive
12 officers. I believe fundamentally that we are underpaying
13 our CEO and all of our executives and that they have
14 earned and deserve a raise. And if we are going to
15 competitively compete, we do need to pay a greater salary
16 than we're paying now.

17 But from the day that I was placed on this Board,
18 I've expressed my reservations with the incentive-laden
19 programs that we have for our executives. Our members
20 work for a salary and a pension. We should be the
21 standard-bearer of salaries and pensions. I understand
22 completely when it comes to the Investment Office, the
23 need to have a different strategy.

24 But what we have tried to do during the years
25 that I've been on this Board is adapt a private sector

1 model to a public sector model, where it will never work.
2 An illustration of the failure of the ability of this to
3 work is I am not permitted to ask the CEO or the CIO what
4 their opinion would be on any of the incentive programs
5 that are before us. The very people that have the
6 fundamental responsibility for carrying out this
7 organization's responsibility cannot be comment on the
8 incentive programs that we are being told are going to
9 give us the kind of performance that we need in this
10 organization. That is the definition of a broken system.

11 It's not broken because of any of the work on
12 this Committee, most particularly our Chair and our Vice
13 Chair who have done a remarkable job of trying to make
14 this work. It's not broke because of the quality of the
15 recommendations we get -- received from GGA. If anyone
16 could make this system work, I believe Brad and Peter
17 could. And with deep respect, I fundamentally disagree
18 with their approach to what we should be doing when it
19 comes to paying salaries.

20 The argument for incentives is that they will
21 produce a performance that we would not otherwise receive.
22 The performance that we've received from our executives is
23 absolutely exemplary. It is so, because of their
24 commitment to their profession, and their commitment to
25 this organization, and to the mission of this

1 organization. We should be paying them the salary they
2 deserve. We should not be engaging in a process that
3 instead of incenting them, at the end of the day is going
4 to lead to discussions as to whether or not they should
5 receive a midpoint, a two-thirds point, or a four-fourths
6 point of their incentive. And that conversation will take
7 place here on this dais with wonderfully committed people.
8 But it is going to be a subjective conversation. And if
9 it is a different conversation than everyone that I've had
10 before on this Board, instead of leading to increased
11 incentives and increased desire to perform, it will lead
12 to days of disillusion on the part of the individuals that
13 were trying to perform.

14 We need to stop this and move forward with a
15 process for our executives that is based solely on salary.
16 And if they underperform, then we have an opportunity to
17 take and rectify that underperformance by doing our job,
18 which is to sit down with them and talk about their
19 underperformance, and what it's going to take to move
20 forward. We should be doing that kind of conversation
21 always directly and not through the indirect means of
22 providing a less-than-optimal incentive payment.

23 Respectfully, I will vote no.

24 (Applause).

25 MR. KELLY: Mr. Chair, I was wondering if I could

1 respond to that?

2 CHAIRPERSON PACHECO: Yes, you -- yes, sir.

3 MR. KELLY: Mr. Middleton, I completely respect
4 your opinion. I always respect your views on these
5 things. I would like to point out the fact that I am
6 unaware of a pension fund that is fully funded or
7 overfunded that does not have a progressive incentive
8 structure in its place for all employees, for executive
9 staff and investment staff.

10 Being Canadian, I wear it proudly. But I'd also
11 like to remind you that north of this border, based -- if
12 I recall the data correctly, Mercer does an annual study.
13 And in -- at the end of 2021, if I recall this correctly,
14 the median in the entire country was 108 percent funded,
15 the entire country, all the pension funds in Canada within
16 the Mercer portfolio.

17 I can also say that less than four percent, if I
18 recall correctly, were under 80 percent funded. It's an
19 envious position to be in. But the way they got there is
20 by having the fortitude and the courage to implement
21 really strong performance-based pay structures that have
22 those conversations -- those performance conversations, as
23 you mentioned, Ms. Middleton, about, you know, how do you
24 overcome barriers, how do we always consistently improve,
25 what are the challenges that you see before you and how do

1 we work collectively to make these things work.

2 But if you can't perform and if you've shown a
3 track record for not performing, then this may not be the
4 organization for you. It's a different way of approaching
5 it, but it is the structure that has been adopted. And I
6 can tell you that that structure has got these funds into
7 the envious position they're in. Particularly, one of the
8 first funds was the very fund that your CIO spent a huge
9 part of her early career in, Ontario Teachers. They were
10 kind of the pioneers in this.

11 And so I think you have the right pieces in
12 place. It's just about evolving them and consistently
13 focusing on a strong pay-for-performance culture that can
14 help incentivize, and drive performance, and get people
15 to -- and I'm not saying that your employees are not
16 driven, absolutely not. But what I am saying is that
17 incentives have been proven -- incentive structures have
18 been proven to really help move that needle and get you
19 into that, you know, fully funded position. And that is
20 what we're advocating here. And I respect your opinion
21 and your views, but I would just say that the data and
22 that -- the trend that we're seeing would actually --
23 would say the contrary.

24 COMMITTEE MEMBER MIDDLETON: Brad, thank you.

25 CHAIRPERSON PACHECO: Sorry. So I would like to

1 thank you, Ms. Middleton. Thank you, Mr. Kelly, for that
2 information. It's very. Useful

3 I'd like to now open it up to public comments.
4 And I'd like to get -- like to call up Mr. Behrens to the
5 floor, please.

6 Mr. Behrens, please identify yourself and --

7 MR. BEHRENS: Thank you, Mr. Pacheco and
8 Committee members. I really like the engagement between
9 the Committee members here and the experts presenting
10 their recommendations this morning. I'm speaking in favor
11 of the motion. And I understand Ms. Middleton's concerns
12 and kind of agree with that too. So it's hard -- it's
13 hard for me to separate what I'm about to say, but I'm
14 going to try it anyway.

15 I think the salary has got to remain competitive.
16 I've seen far too many talented CalPERS management teams
17 in all different levels leave, because the public sector
18 offers them a better deal than CalPERS can. And I think
19 that's a tragedy that maybe the Board can start to
20 overcome by having these kinds of discussions.

21 You know, years ago, I gave testimony to the
22 Little Hoover Commission regarding compaction for State
23 employees, between the management team and rank and file.
24 And at that time, there was 400 different types of State
25 employees where there was less than five percent

1 difference between the management leader and the rank and
2 file employee. It never went anywhere, but at least I got
3 a change to voice my opinion. I kind of feel like this is
4 the same kind of discussion you're having this morning.

5 But I would like to separate the
6 pay-for-performance bonus part of what you've had in your
7 discussion this morning, because it's always been a
8 mystery to me, at least for the last 12 years I've been
9 coming to these meetings, how the Board decides to give a
10 bonus. It feels like they take a bow and arrow and shoot
11 at a target, and wherever the arrow lands that's what
12 happens. They get a bonus.

13 I don't see a clock, so I don't know how much
14 time I have.

15 CHAIRPERSON PACHECO: There's some sort of
16 technical difficulty.

17 MR. BEHRENS: Well, good. I can keep talking
18 then.

19 (Laughter).

20 MR. BEHRENS: So I would like to see the
21 Committee and the Board in the future try to separate
22 those two items. CSR is fully supportive in having
23 competitive salaries for the management team and all those
24 different categories of the team that they were covering
25 this morning. When it comes to the bonuses that they look

1 at every year, I would like the Committee and the Board to
2 take a closer look at how they come to an end result for
3 granting that bonus or not.

4 And I also would agree fully with Ms. Middleton
5 that I think it would be great. It would be the only time
6 I would ever support a closed meeting, if the Board would
7 meet with all of the people we're talking about, all the
8 different categories of people we're talking about and
9 discuss those kinds of things face to face, and give them
10 an opportunity to give their side of the story, so you all
11 have more insight into the -- making a informed decision.

12 Thank you.

13 CHAIRPERSON PACHECO: Thank you, Mr. Behrens.

14 Ms. -- next up is Ms. Fountain.

15 Mr. Fountain, excuse me, so sorry.

16 Good morning, sir. Please identify yourself and
17 you have three minutes.

18 MR. FOUNTAIN: Yes. Good morning. I'm Jerry
19 Fountain, Chief Financial Officer for the California State
20 Retirees. And I speak strongly in support of the motion
21 that's on the board. And I agree tremendously with Mr.
22 Pacheco and Ms. Middleton's comments.

23 I've sat through a number of these meetings and
24 it's always come out with the same result, increase,
25 increase, increase, and let's not worry about performance.

1 And it's time to rip the band-aid off. You know, what
2 we're talking about here can be properly renamed is annual
3 salary adjustments, not anything to do with incentive.
4 And if we have to pay our employees, not use the term I
5 heard a few minutes ago to encourage them to do their job,
6 then it's time to let that employee go.

7 So, I appreciate this opportunity to speak to the
8 Board and I also apologize for any high frequency
9 whistling you heard previously. It's new hearing aids and
10 a hearing device. So thank you for this opportunity.

11 CHAIRPERSON PACHECO: Mr. Fountain, there's no
12 apology. Thank you, sir.

13 Are there any more discussions from the floor or
14 from the public?

15 BOARD CLERK ANDERSON: (Shakes head).

16 CHAIRPERSON PACHECO: I see none, so I would like
17 to call the question. And the -- and the roll call, have
18 a roll call vote on this motion.

19 BOARD CLERK TRAN: Mullissa Willette?

20 VICE CHAIRPERSON WILLETTE: Aye.

21 BOARD CLERK: Lisa Middleton?

22 COMMITTEE MEMBER MIDDLETON: No.

23 BOARD CLERK: Eraina Ortega?

24 COMMITTEE MEMBER ORTEGA: No.

25 BOARD CLERK: Kevin Palkki?

1 COMMITTEE MEMBER PALKKI: Aye.

2 BOARD CLERK: Theresa Taylor?

3 COMMITTEE MEMBER TAYLOR: Aye.

4 BOARD CLERK: Yvonne Walker?

5 COMMITTEE MEMBER WALKER: Aye.

6 CHAIRPERSON PACHECO: Based on the ayes, the
7 motion carries. Thank you.

8 Next item on the agenda.

9 Oh, yeah. And then finally, there's just one
10 more thing I forgot to ask. I'd like to also add some
11 direction, based on the comment -- public comments that we
12 received and so -- and other -- others. I'd like to
13 direct CalPERS HR to reflect any adjustments to the base
14 salary ranges, annual and long-term incentive opportunity
15 levels within an updated Compensation Policy, which I
16 believe would be brought in June, is that -- is that my
17 understanding?

18 HUMAN RESOURCES DIVISION CHIEF TUCKER: Yes, Mr.
19 Chair. We'll bring the policy back in June.

20 CHAIRPERSON PACHECO: Thank you. And that will
21 be it for this particular motion.

22 I'd like to take five minutes until we move to
23 the next item, or actually maybe -- no, or 10 minutes, or
24 do you want to -- do you need -- do we need a break or no.

25 There's no -- I guess we don't need a break, so

1 we'll move on to the next item on the agenda, which is the
2 information agenda item, the annual review of the
3 2023-2024 incentive matrix.

4 Ms. Tucker, please.

5 HUMAN RESOURCES DIVISION CHIEF TUCKER: Thank
6 you, Mr. Chair. Thank you, members of the Committee.
7 Item 6a is an information item. To comply with the
8 Board's policy, incentive metrics are reviewed annually by
9 the Board's primary compensation consultant, GGA. GGA
10 will present their initial analysis and observations on
11 the incentive metrics for the Committee's consideration
12 and discussion. Based on the Committee's feedback,
13 they'll return in June of 2023 with final recommendations
14 for implementation in fiscal year 23-24. Final
15 Board-approved metrics will be included in some
16 combination on incentive plans for eligible executive and
17 investment management positions.

18 That does conclude my opening remarks and I can
19 invite Mr. Landers and Mr. Kelly to begin their
20 presentation. Thank you.

21 CHAIRPERSON PACHECO: That would be wonderful.
22 Thank you, Mr. Landers and Mr. Kelly.

23 (Thereupon a slide presentation).

24 MR. KELLY: Excellent. Thank you very much.

25 To start, if I can get the opinion letter up

1 there, or --

2 CHIEF OPERATING OFFICER HOFFNER: No, it's just
3 in the materials. It's not in the presentation.

4 MR. KELLY: It's in the materials. Okay. Well,
5 if I can direct everyone's attention to the opinion letter
6 that was in the materials for today's meeting. The first
7 item I'd like to address is the title, which is,
8 "Incentive Metrics Review". And I appreciate everyone's
9 comments on incentives -- their opinions on incentives,
10 the Honorable Member's comment on incentives.

11 We always advocate that we shy away from the use
12 of the word "bonus". Bonus would, you know, basically
13 indicate that it's almost a right. It's expectation.
14 That it is like, you know, Christmas Vacation, where you
15 expect to get it, it's the end of the year, and you're
16 going to invest in a pool. That's not the case and that's
17 never what we've advocated for any of our clients. We
18 strongly, strongly support objective pay for performance.
19 And this opinion letter is kind of the beginning of the
20 process going into the next fiscal year.

21 So that being said, in terms of the general
22 background, we're always asked to comment on, you know, is
23 it the right element or the right structure? There's five
24 key elements that are used on an annual basis, one is fund
25 performance, the other is enterprise operational

1 effectiveness, the third is Investment Office performance
2 based on CEM benchmarking against other comparable pension
3 funds, customer service provided to your members,
4 stakeholder engagement to your general stakeholders.

5 We believe that these five key areas are
6 definitely the areas that you should continue measuring
7 and including in the annual incentive. And so we
8 wholeheartedly approve and support their inclusion in the
9 incentive program going forward.

10 In terms of a timeline, as Ms. Tucker had pointed
11 out, the next meeting we will be coming forward with
12 specific objective metrics for these elements that would
13 be tested and made fair. So if you recall, what we've
14 done in the past is we've done a historic prevalence
15 assessments of it to make sure that it's both fair from an
16 organizational standpoint, but also fair from an employee
17 standpoint, so that both sides, their views, concerns are
18 being met.

19 And so that -- that will be the -- in terms of
20 the timeline, that will be the next step we'll be coming
21 forward with objective metrics, similar to the metrics
22 that were provided in the materials for today, which
23 we're -- the objectives -- or the metrics that are being
24 applied to the 22-23 fiscal year will be coming forward
25 with similar metrics for 23-24. Okay. So that being

1 said.

2 In terms of our specific recommendations, we've
3 broken them down, because part of the recommendations fall
4 under the Boards delegated authority -- Board's authority,
5 and then some of the other recommendations fall under the
6 delegated authority that you appoint to your CEO and her
7 team.

8 So that being said, the first recommendation we
9 have under the Board's authority is to continue measuring
10 stakeholder engagement. We believe that it is a valued
11 element that should continue to be tracked, but we have
12 recognized that participant engagement has started to
13 dwindle. The first question that was asked of us was
14 around specific groups within the -- your stakeholder
15 makeup and what is fair an objective to include, if, you
16 know, specific groups just aren't responding or if other
17 groups are dominating. And so, you know, we said
18 definitely there's a concern there and we should be
19 looking at possibly just not having a group waiting, but
20 just wait all the responses collectively. So that was the
21 first one.

22 But then we found out that just the overall
23 participation has continued to dwindle. And so the
24 question is, at what point do you include objective
25 measurements and objective results in something like this,

1 when it really is only recognizing a very, very small
2 portion of your stakeholders. And so the worry there, the
3 concern is that if it dwindles down to such a minimal
4 number or percentage of your stakeholders, it could
5 actually reflect, well, one of two things, because this is
6 what we typically see in participation around these
7 things.

8 You can get two extremes. It will either
9 overweight everyone who's extremely satisfied and is just
10 so overwhelmed with the -- with the engagement that
11 they've got, that they have to give you great marks, or
12 the exact opposite, people are so upset that they feel
13 compelled to send in a response. Either extremes are not
14 useful, because they're weighted on, you know, specific
15 groups.

16 So we want to get basically an understanding of
17 what are the metrics, what objectively statistically makes
18 sense to make sure that you're basing these objectives on
19 realistic data that truly is reflective of your overall
20 stakeholder makeup.

21 And so we -- as I say, our recommendation is to
22 continue to include it, but we will be working with the
23 CalPERS team to come up with some objective numbers that
24 will go into your policy that will say if certain
25 stakeholder groups fall below a certain level or if

1 overall participation falls below this certain level, here
2 is what we would recommend applying that year.

3 Again, it provides a bit more objective -- more
4 of an objective process for you to follow, but I think it
5 would be much -- it would be fairer for your employees,
6 because it wouldn't be holding them against data that
7 could be misleading. And so that's our concern for the
8 first one.

9 Any questions on that element?

10 CHAIRPERSON PACHECO: I do have a question about
11 that. I really do appreciate that comment about the
12 stakeholder engagement. You know, I see this -- we need
13 objective information. I don't want -- as is more
14 commonly out there in the world, you know, when you go to
15 a restaurant and you do the Yelp thing, I don't want us to
16 be using Yelp as our benchmark on these kind of things.

17 And you never know what's going to be out there.
18 Having some objective data, making it data -- and then
19 also, your comment, regarding having perhaps a floor. You
20 know, that there's a certain minimum that we need in order
21 for something to be statistically valid for us. So I feel
22 those are quite important elements that we need to
23 incorporate and a thought process carried forward. So
24 those are my -- those are comments. Nothing really about
25 that, but I definitely do not want to be Yelp.

1 Thank you.

2 MR. KELLY: Absolutely. The second
3 recommendation we have that falls under your Board
4 authority is to continue to support the exclusion of lump
5 sum retirement payments, because the overall operational
6 performance and expenses associated with that includes
7 lump summary retirement payments that you've assumed,
8 through employee that have worked in other State agencies,
9 and now just by virtue them finishing off their careers in
10 CalPERS, you're now obligated to take the full load of
11 that pension obligation.

12 It's not necessarily fair. It doesn't truly
13 reflect the overall operational performance of your fund.
14 It's just the nature of the migratory opportunities that
15 public employees have, which is fantastic, but it has a
16 negative impact. So what we would never want to happen is
17 for you to shy away from bringing in really good capable
18 people who are in the latter end of their career, because
19 you know it will negatively impact your overall
20 performance. We don't want that.

21 So we feel that the fairest way to move forward
22 is to take those lump sum payments that you have now
23 adopted and not include them, because then that is truly
24 reflect -- reflective of the operational performance of
25 your organization and not through the historic patterns of

1 employment throughout the state.

2 Any questions on that one?

3 No.

4 CHAIRPERSON PACHECO: I see none.

5 Continue.

6 MR. KELLY: Excellent. And the third one for
7 your Board is again to continue the alignment. We
8 recognize that you've gone through the painstaking, but
9 absolutely crucial process of coming up with a new
10 strategy. And that is definitely required of your fund,
11 especially a fund of your size, to continue being that
12 guiding light for your Board and for your staff. And we
13 like the fact that there is direct alignment between the
14 metrics used in your strategy and the metrics used in the
15 incentive plan, and we would just encourage that that
16 direct and philosophy continue to be applied moving
17 forward.

18 Any questions with regard to that one?

19 CHAIRPERSON PACHECO: No.

20 MR. KELLY: In terms of recommendations for the
21 delegated authority of Marcie and her staff, the first one
22 we have is around investment staff, in creating --
23 increasing the weighting on quantitative performance to 75
24 percent of their annual incentive performance. And we
25 see -- and again, this is to further reinforce the

1 objective performance of your fund, and the objectives
2 that you're putting forward, and the strategy that you
3 have in place. We feel that the objective metrics help to
4 move that needle, continue to help move that needle, and
5 we would support increasing the weight on the objective
6 side.

7 We would also recommend the increasing waiting
8 for total fund going from 50 to 65 percent. And that is
9 aligned -- if you recall, the decision that your Board
10 made a number of years ago in terms of focusing solely on
11 total fund, we feel that total fund is a very, very
12 important objective to focus on and it helps to galvanize
13 your entire staff and the Board, because ultimately if
14 you're not getting your actuarial threshold, you're not
15 actually -- you're not mathematically sustainable. Okay.
16 So it's critical that you focus on that. And having a
17 strong weighting on total fund performance is a great way
18 to keep everyone focused on that principal goal of
19 maintaining a sustainable fund for your members.

20 Any questions on that?

21 No.

22 CHAIRPERSON PACHECO: I see no questions.

23 MR. KELLY: I think I'm preaching to the choir
24 here.

25 (Laughter).

1 MR. KELLY: The next one again, we want to
2 maintain consistency and we don't want to continue to
3 belabor the point here, but we still consider that the
4 decision that this Board made a number of years ago to
5 exclude asset class performance was something that is not
6 necessarily aligned to market practice and best practices
7 out there. We understand, as I said before, the
8 philosophy behind it in terms of galvanizing your staff,
9 but we feel that by doing so, two things can happen, one
10 people who are not performing at the level that they could
11 or should are not actually able -- or they're able to
12 basically still retain some level of incentive based on
13 other's performances around them, but more importantly,
14 it's about your high performers --

15 CHAIRPERSON PACHECO: Um-hmm.

16 MR. KELLY: -- your stars -- your rock stars that
17 you want to have a -- you want to have a way of
18 recognizing them objectively and recognizing the
19 performance that they've made to their team, to their
20 asset class of their portfolio, and helping to reward
21 them, so that they can stand out within the organization
22 itself and be recognized for the stellar performance that
23 they're putting in above and beyond the people around
24 them. And again, that's part of that pay for performance
25 motivating factor.

1 So we do recognize that you do have a relatively
2 new CIO who's coming in and is working with the team and
3 has a game plan that she would like to put in place. And
4 so as you saw in our note, we would support the
5 reinsertion or the inclusion of asset class portfolio
6 performance at some point in the future, recognizing that
7 there's some changes that are underway, but we just don't
8 want to stray away from the recommendations that we've
9 always provided this Board. We want to maintain some
10 consistency around that.

11 Any questions with regard to that?

12 CHAIRPERSON PACHECO: I see none, so continue on,
13 sir.

14 MR. KELLY: And finally, the last recommendation
15 we had is for the COO, the CFO, and the General Counsel.
16 Again, we feel that everyone should be focused on, you
17 know, similar principle goals, which is total fund
18 performance. And so therefore, we feel that there should
19 be an element of -- an inclusion of that element within
20 their incentive package to again further focus all
21 efforts. We do recognize that there have been some
22 concerns about that in the past, but we know that there
23 are ways to get around some of the concerns that you've
24 had, and -- but we still think that it's really important
25 to keep everyone focused on the same things. And these

1 are three key roles within your organization that can, you
2 know, continue to help move the overall performance of
3 your organization. So that's why we recommend the
4 inclusion of that element within their incentive plans.

5 Any other questions?

6 CHAIRPERSON PACHECO: I see no other questions.

7 MR. KELLY: The one thing that -- going into the
8 appendices and I won't go into them in detail here, but
9 what I will say is there was a question around the
10 comparasive -- the comparative data that we provided for
11 CalPERS and CalSTRS. Basically, this is something that we
12 typically would have in an appendice -- in the appendices,
13 but we brought this forward, because it was point of
14 conversation in a number of our meetings in the past and
15 we wanted to bring it up front to say that there was some
16 concern around the difference in the compensation design
17 of CalPERS and CalSTRS. And that really, you know, the
18 data shows that CalSTRS is not as qualitatively focused as
19 people would suspect.

20 Their -- the data that we put together here, and
21 we apologize if there was some confusion, some of the
22 roles in this list no longer exist. There's been some
23 restructuring that has gone on, some reclassification, but
24 we based it on the historic practice and historic
25 application of their incentive plans in these comparative

1 roles.

2 So that being said, we apologize. There was more
3 substantive footnotes that were included in the appendices
4 in the past, but we deleted those just to be more succinct
5 and precise. And because of that, I think we muddied the
6 waters a bit too much, and we apologize for that. But
7 basically what we're trying to do is show from a historic
8 comparative nature, here's how the rule have been treated
9 in CalSTRS.

10 CHAIRPERSON PACHECO: I see no questions at all.
11 I just want to -- first of all, Mr. Kelly, I'd like to
12 thank you for this presentation and thank you for these --
13 for this lively discussion. And I appreciate it very
14 much.

15 So I would like to now move on to summary of
16 Committee direction.

17 Mr. Hoffner.

18 CHIEF OPERATING OFFICER HOFFNER: Thank you, Mr.
19 Chair. The one piece of feedback I did hear from you was
20 making sure we bring back the updated Incentive Comp Plan
21 Policy in the June meeting, which we will by do.

22 CHAIRPERSON PACHECO: Yes, the adjustments to the
23 base salary ranges, annual --

24 CHIEF OPERATING OFFICER HOFFNER: Yeah, so we'll
25 make modifications --

1 CHAIRPERSON PACHECO: Yeah, within the --

2 CHIEF OPERATING OFFICER HOFFNER: -- to that.

3 And that will be brought back as part of the other agenda
4 items for June.

5 CHAIRPERSON PACHECO: Very good. Are there any
6 other?

7 I see none.

8 I'd know like to open up for public comments.
9 Are there any public comments?

10 BOARD CLERK ANDERSON: (Shakes head).

11 CHAIRPERSON PACHECO: No public comments.

12 So I would like to -- I would to adjourn the
13 meeting and begin the Finance and Administration Committee
14 to begin at 11:10 a.m.

15 Thank you.

16 (Thereupon the California Public Employees'
17 Retirement System, Board of Administration,
18 Performance, Compensation, & Talent Management
19 Committee open session meeting adjourned
20 at 10:56 a.m.)
